To run the web app after downloading the dependencies and installing Flask (see installation guide), we must follow these steps:

1. Open your terminal and navigate to the correct directory, follow this path:

*Code -> Source Code -> **Website***

```
C:\Users\charl\Desktop\FIU SCIS 2020 aiforall\Code\Source Code\Website>
```

2. type in and run: *python3 app.py*

```
C:\Users\charl\Desktop\FIU SCIS 2020 aiforall\Code\Source Code\Website>python3 app.py
 * Serving Flask app "app" (lazy loading)
 * Environment: production
   WARNING: This is a development server. Do not use it in a production deployment.
   Use a production WSGI server instead.
 * Debug mode: on
 * Restarting with stat
 * Debugger is active!
 * Debugger PIN: 289-158-587
 * Running on http://127.0.0.1:5000/ (Press CTRL+C to quit)
```

3. Open a browser and go the address: *localhost:5000*
