Prerequisites

- Python 3.5+

Installation Guide

This is an installation guide for our flask app (synonymous with our website). To be able to run the app, there are a few steps:

1a. To Navigate to the correct directory, follow this path:

*Code -> Source Code -> **Website***

1b. (optional but recommended) Create a virtual environment.

2. Download the dependencies:

- Werkzeug

- Jinja2

- MarkupSafe

- ItsDangerous

- Click

- requests

- pandas

- demjson

- matplotlib

The exact versions of each of these dependencies can be found in the *requirements.txt* file inside the *website* directory

3. Install Flask:

$ pip install Flask

This concludes the installation guide. Running the app will be covered in the *User Manual*
